Community Health Improvement Plan

October 13, 2016

September 28, 2016

Dear Community Residents,

I am pleased to share with you a copy of the most recent Community Health Action Plan/CHIP(Community Health Improvement Plan) for Rutherford Polk and McDowell Counties. I prefer the term CHIP and it is the term I will reference. CHIP is a component of the Community Health Assessment Process(CHA), which provides our communities with the challenge of developing prioritized strategies to Improve Health based on the data and information received from the CHA. A final component is measuring the Results achieved after strategies have been implemented.

There are generally four considerations when developing plans to Improve Health and Well-Being for All. # 1. **Know What Affects Health:** Action Areas; Socioeconomic Factors, Clinical Care, Health Behaviors and Physical Environment. #2. **Focus on Areas of Greatest Need:** Your zip code can be more important than your genetic code. Profound health disparities exist depending on where you live. # 3. **Collaborate with Others to Maximize Efforts:** Collective Vision. # 4. **Use a Balanced Portfolio of Interventions for Greatest Impact:** Action in one area may produce positive outcomes in another. Start by using Interventions that work across all 4 Action Areas. Over time, increase investment in Social Determinants for the greatest impact on Health and Well-Being for All. CHIP's focus on strategies that support sustainable policy and environmental changes that increase people's ability to make healthy choices is also critical to achieve success.

Prioritized focus area for Rutherford Polk and McDowell County include: Tobacco Free Lifestyles for all especially pregnant women, young adults and teens; Easy Access to: healthy food, playgrounds, greenways and trails; Addiction Free Lifestyles by reducing, under-age drinking, E-cigarette use and Drug overdose; and Mental Health by increasing access to Behavioral Health services. Obviously, there are many other health areas we can work on that are related to the ones listed ie Chronic Disease is just one example; hopefully working on one priority will also lead to positive outcomes in another.

Please join your communities' efforts to improve HEALTH!

"It is amazing what you can accomplish if you do not care who gets the credit." **Harry S. Truman**

Please contact our Public Health Department if you want to get involved or have questions at (828) 223-1001 or Email ycisneros@rpmhd.org.

Sincerely,

James H. Hines, Jr.

RPM Public Health Director

Community Health Action Plan 2015 – Physical Activity

County: McDowell Period Covered: 2015

Partnership/Health Steering Committee, if applicable: McDowell Health Coalition

Community Health Priority identified in the most recent CHA: Physical Activity

Local Community Objective: **Physical Activity:**

(check one): **New** **Ongoing** (*addressed in previous Action Plan*)

- Baseline Data:** 46.2% of adults in McDowell County meet Physical Activity Recommendations of 150 minutes of activity per week (2015 PRC Healthy Communities Survey) and 53.8% or 18,830 adults are not physically active.
- For continuing objective provide the updated information:** According to the 2015 PRC Healthy Communities Survey 53.8% or 18,830 adults are not physically active.
- Healthy NC 2020 Objective** that most closely aligns with focus area chosen below: Increase the percentage of adults getting the recommended amount of physical activity to 60.6%.
- Population(s)**

Describe the local target population that will be impacted by this community objective:

The total population of McDowell County was 44,996 in 2010 according to US Census Bureau. A large majority of the population is white, while about 3.6% are of African descent. A growing segment of the population (5.3%) are people of Hispanic ancestry.

Individuals with less education and those with lower incomes are more likely to smoke. Compared to the Western NC Region, McDowell has 8% lower overall High School Graduation rates (for a 4-year cohort of 9th graders entering school in 2010-2011 and graduating in SY 2013-2014 (US Census Bureau).

People with less than a high school education are three times as likely to smoke as college graduates. The estimated poverty rates in McDowell County have been steadily rising. The rate was 21.9% of adults living below 100% of poverty in the aggregate period of 2009-2013 (US Census Bureau). Those with higher incomes are less likely to smoke. Individuals with certain lifetime mental illnesses and those with serious psychological distress are more likely to use tobacco.

I.

- A. **Total number of persons in the target population specific to this action plan:** 18,830 adults currently not getting recommended amount of physical activity.
- B. **Total number of persons in the target population to be reached by this action plan:** 4000 - those living below 100% of poverty.
- C. **Calculate the impact of this action plan:**
(Total # in B divided by total # in A) X 100% =21% of the target population reached by the action plan.)

Healthy North Carolina 2020 Focus Area Addressed: Each of the two CHA priorities selected for submission must have a corresponding *Healthy NC 2020* focus area that aligns with your local community objectives.

■ Check below the applicable Healthy NC 2020 focus area(s) for this action plan.

For more detailed information and explanation of each focus area, please visit the following websites: <http://publichealth.nc.gov/hnc2020/foesummary.htm> AND <http://publichealth.nc.gov/hnc2020/>

County: McDowell Period Covered: 2015

Partnership/Health Steering Committee, if applicable: McDowell Health Coalition

Community Health Priority identified in the most recent CHA: Smoking During Pregnancy

Local Community Objective: Tobacco & Maternal Infant Health - Decrease the percentage of women who smoke during pregnancy

(check one): **New** **Ongoing** (*addressed in previous Action Plan*)

Baseline Data: (*State measure/numerical value. Include date and source of current information*):

The percentage of women who smoked during pregnancy was 23.6% in 2013. This rate is higher than it was in 2008 in McDowell and higher than the NC rate in 2013.

(State Center for Health Statistics 2008-2013)

23.5% of pregnant women smoke during pregnancy.

For continuing objective provide the updated information: (*State measure/numerical value. Include date and source of current information*):

Healthy NC 2020 Objective that most closely aligns with focus area chosen below: Decrease the percentage of women who smoke during pregnancy to 6.8% by 2020. **Population(s)**

Describe the local target population that will be impacted by this community objective:

The total population of McDowell County was 44,996 in 2010 according to US Census Bureau. A large majority of the population is white, while about 3.6% are of African descent. A growing segment of the population (5.3%) are people of Hispanic ancestry.

Individuals with less education and those with lower incomes are more likely to smoke. The poverty rates in McDowell County have been steadily rising due to decreased economic opportunities. 21.9% of the population lives below 100% of poverty. 23.2% of the population lives at 100%-199% poverty according to the 2015 PRC Community Health Survey. The median family income in McDowell County is \$11000 below the NC state average (US Census Bureau).

People with less than a high school education are three times as likely to smoke as college graduates and those with higher incomes are less likely to smoke. Compared to WNC, McDowell County has 8% lower overall High School graduation rate. (2009-2013 NC State Center for Health Statistics).

The percentage of women who smoked during pregnancy was 23.6% in 2013. This rate is higher than it was in 2008 in McDowell and higher than the NC rate in 2013.

Smoking during pregnancy is associated with multiple adverse birth outcomes, including low-birth-weight babies and pre-term deliveries according to the State Center for Health Statistics and NC DHHS.

Smoking during pregnancy is an unhealthy behavior that may have negative effects on both the mother and the fetus. Smoking can lead to fetal and newborn death, and contributes to low birth weight and pre-term delivery. The Western NC region has very high percentages of women who smoke during pregnancy and Rutherford County's rates are similar to many WNC counties.

A. **Total number of persons in the target population specific to this action plan:** 123 pregnant women smoked during pregnancy in 2013.

B. **Total number of persons in the target population to be reached by this action plan:** 61

C. **Calculate the impact of this action plan:**

(Total # in B divided by total # in A) X 100% =50% of the target population reached by the action plan.)

Healthy North Carolina 2020 Focus Area Addressed: Each of the two CHA priorities selected for submission must have a corresponding *Healthy NC 2020* focus area that aligns with your local community objectives.

Selection of Strategy/Intervention Table

- Complete this table for all strategies/interventions that you plan to implement.
- At least two of the three selected community health priorities must be from the 13 Healthy North Carolina 2020 (HNC 2020) focus areas. For these 2 priorities, there must be 2 evidence based strategies (EBS) for each action plan. (Insert rows as needed if you choose more than 2 EBS.)

Strategy/Intervention(s)	Strategy/Intervention Goal(s)	Implementation Venue(s)	Resources Utilized/Needed for Implementation
Name of Intervention: 100% Tobacco-Free Schools	S.M.A.R.T Goals: Work with schools and school districts to improve policy and compliance (including e-cigarette policy and usage), and to increase implementation of evidence-based strategies that support cessation for youth and school employees – on going from July 2016 – December 31, 2018	Target Population(s): Youth and pregnant women Venue: Schools	Resources Needed: Staff time
Name of Intervention: Mass Media Campaigns promoting Quit Line NC with ads that relate to pregnancy. Community Strengths/Assets: Rutherford Polk McDowell Healthy Communities Program Funds and Program Management Staff in place. Tobacco and Control Branch Regional Manager.	S.M.A.R.T Goals: By July 31, 2016, launch mass media campaign to promote Quitline NC using digital media, printed materials, posters, coasters, DVDs in Middle Schools and High Schools.	Target Population(s): General Population especially low income, low educational status, women ages 18-39 and pregnant women. Venue: Mobile Devices Schools, Community Colleges, Clinics, Social Services, Libraries, Mental and Behavioral Health Agencies.	Resources Needed: CDC Tips Campaign Ads Healthy Communities Program Funds Project Managers Staff Time TA from Media Buyer
Name of Intervention: Implementation of the 5As Brief Cessation Counseling through the Maternal Child Health Initiative (MCHI).	S.M.A.R.T Goals: Have patient complete online registration for Quitline NC. Provide gift to patient for initial registration. Complete vitals.	Target Population(s): WIC and Nurse Family Partnership Staff at Health Department, Maternal Clinical Staff, Mental Health and Behavioral Health Staff in local clinics, and pregnant women who smoke.	Resources Needed: Staff time 5As pocket card Quit Line Fax Referral Materials

<p>Community Strengths/Assets:</p> <p>MCHI RPMHD Staff Tobacco and Control Regional Manager County Partners McDowell Hospital Cessation Programs McDowell Health Coalition</p>	<p>Venue:</p> <p>Take Pre-test C)2 measurement (2x). Play CDC Tips video Mark patient record with data points accordingly. Assess current needs and gaps within local community to address smoking during pregnancy with clients and staff by December 1, 2016 through the Maternal Child Health Initiative (MCHI).</p> <p>Deliver 1 or more 5As Training to staff each year. Provide materials for Fax Referrals to Quitline by December 31, 2016, 2017, 2018.</p>	
<p>Name of Intervention: Triangulum Seminar for Educators</p> <p>Community Strengths/Assets:</p> <p>Tobacco and Control Branch RHA Prevention Services Staff Healthy Communities Program Staff and funds Local School Staff Local Law Enforcement Professionals McDowell Health Coalition</p>	<p>SMART Goals:</p> <p>On August 23, 2016, RPMHD will host a Seminar for Health and PE Teachers, school nurses, counselors and School Resource Officers. The seminar will educate about new research on e-cigarettes and other electronic nicotine and THC (ENDS) delivery systems. New Tobacco Prevention curriculum will be introduced and provided for Middle School and High School students. We expect 60 attendees.</p> <p>New Curriculum will be introduced and provided to MS and HS Teachers. A panel discussion on current trends will be presented and discussed by leaders in various community populations that work with youth and adults.</p> <p>Related Posters and other tools will be distributed to Schools, Clinics and other agencies as part of the mass media campaign to promote Quitline NC.</p>	<p>Target Population:</p> <p>PE Teachers, school nurses, counselors and School Resource Officers, Law Enforcement Professionals, Curriculum Directors.</p> <p>Middle School and High School students are an indirect intended population - they will receive education via their teachers and others listed above.</p> <p>Venue: Schools</p> <p>Resources Needed:</p> <p>Staff from Tobacco and Control Branch to deliver presentation on new research into Triangulum. Healthy Communities Staff to Organize Invitations Lunch Boxes Curriculum RHA partners Media advocacy</p>

Community Health Action Plan 2015 – Current Tobacco Use

County: McDowell Period Covered: 2015

Partnership/Health Steering Committee, if applicable: McDowell Health Coalition

Community Health Priority identified in the most recent CHA: Current Tobacco Use

Local Community Objective: **Tobacco** - Decrease the percentage of adults who are current smokers

(check one): **New** **Ongoing** (*addressed in previous Action Plan*)

- Baseline Data:** (*State measure/numerical value. Include date and source of current information*): 29.6% of McDowell Adults report currently using tobacco according to the PRC Community Health Survey 2015
- For continuing objective provide the updated information:** (*State measure/numerical value. Include date and source of current information*): 29.6% of McDowell Adults report currently using tobacco according to the PRC Community Health Survey 2015
- Healthy NC 2020 Objective** that most closely aligns with focus area chosen below: Decrease the percentage of adults who are current uses to 2020 goal of 13%.

Population(s)

Describe the local target population that will be impacted by this community objective:

The total population of McDowell County was 44,996 in 2010 according to US Census Bureau. A large majority of the population is white, while about 3.6% are of African descent. A growing segment of the population (5.3%) are people of Hispanic ancestry.

Individuals with less education and those with lower incomes are more likely to smoke. Compared to the Western NC Region, McDowell has 8% lower overall High School Graduation rates (for a 4-year cohort of 9th graders entering school in 2010-2011 and graduating in SY 2013-2014 (US Census Bureau).

People with less than a high school education are three times as likely to smoke as college graduates. The estimated poverty rates in McDowell County have been steadily rising. The rate was 21.9% of adults living below 100% of poverty in the aggregate period of 2009-2013 (US Census Bureau). Those with higher incomes are less likely to smoke. Individuals with certain lifetime mental illnesses and those with serious psychological distress are more likely to use tobacco.

I.

- A. **Total number of persons in the target population specific to this action plan:** 8100 adults currently using tobacco
- B. **Total number of persons in the target population to be reached by this action plan:** 7000
- C. **Calculate the impact of this action plan:**

(**Total # in B divided by total # in A) X 100% =86% of the target population reached by the action plan.**)

Healthy North Carolina 2020 Focus Area Addressed: Each of the two CHA priorities selected for submission must have a corresponding *Healthy NC 2020* focus area that aligns with your local community objectives.

- Check below the applicable Healthy NC 2020 focus area(s) for this action plan.**
